

Home 2 Ocean March Project

These are just 5 of the many low water plants that you can use in gardens in the San Diego area. This month's project requires a few minutes of research. Go to www.google.com, and type in the name of one of the plants you see at the bottom. Click on the 'images' tab at the top of the page, and you'll see hundreds of pictures of that plant! Guess which ones I used to do my drawing? Then follow this maze to plant it near the house.
